## Bulk Antibodies For Research! In Vivo Ready!

Bio X Cell is a biotechnology company that manufactures high quality, **in vivo ready monoclonal antibodies** (CD markers, interleukins, cytokines, etc) of rat, mouse and human origin for biomedical research. All of our antibodies are of high purity and low endotoxin levels, well suited for in vivo preclinical studies. Bio X Cell custom produces recombinant proteins using state of the art fermentation and purification technology. Bio X Cell has expressed recombinant proteins in all major expression systems including: CHO, NSO, 293, E. coli, and yeast. We offer the antibodies and control IgGs listed below in sizing from 5mg up to 100 mg. We also bulk size up to 50g.

All antibodies are supplied in PBS buffer at a concentration of 1 mg/ml or higher.

The Purity is >95% as determined by SDS-PAGE.

Endotoxin is < 2 EU/mg by LAL test.

Should any of our catalog products fail to perform as published within 6 months of sale, Bio X Cell will offer full replacement of the product, provided the end user has followed the recommended storage instructions.

### Examples of our Products Used in Literature :

| Cat No   | Antibody                        | Clone     | Literature Reference                       |
|----------|---------------------------------|-----------|--------------------------------------------|
| BE0058   | In Vivo MAb anti m TNF alpha    | XT3.11    | Carlson et al. <u>Blood</u> 2009           |
